Since its beginning in 2003, All For Kids Pediatric Therapy has provided critical resources for families needing PT, OT, Speech/Lang and other therapies. Tracey and Erin are parents themselves and understand the importance of incorporating the whole family in a child's therapeutic experience. Their website proclaims this to potential clients, "Experience leads us to believe that parents have the power to impact the most significant change in their kids; thus our focus includes the idea that we don't just work with children, we work with families. We are firmly convinced that parent involvement and education is an important key to progress. Our goal is to ensure that caregivers are active participants in the planning and implantation of therapy." We are grateful for all the support this organization has provided to families served by Stone Soup Group over the years
